

# Hostas

Hosta plant sizes are approximate maximum size. Lighting, moisture, and soil makeup all have an effect on the eventual size of the hosta clump. An effective way of grouping hostas by size is by the size code. In most cases, it will take at least 6 years to reach sizes approaching the (maximum size) listed below.

Prices are for 1-gallon or smaller containers. 2-gallon containers are at a higher price if available. Feature legend:

Sun = Shows tolerance for placement in full sun locations

SlugResist = Leaves are 'extra' thick' which resist slug bits

Shiny = Leaf surface is shiny (not common)

SunColor = All yellow and yellow centered hostas need some sun to produce the yellow color

Frag = Flower is fragrant

Hosta sizes based on Tiny < 5", Dwarf < 10", Small < 15", Medium < 22", Large < 30", Giant > 30" foliage height.
